

5 TIPS FOR USING WIZARDS IN EMR

What Are Wizards? EMR Wizards are useful tools designed to save time and provide additional detail when assessing patients. Useful for GP's and clinicians, here are 5 tips to help you start using Wizards in EMR!

1. DID YOU KNOW THAT THERE ARE 14 DIFFERENT CATEGORIES OF ASSESSMENT?

These 14 categories include:

- | | |
|-------------------------|---------------------------|
| 1. Observations | 8. Work or school |
| 2. Harm from others | 9. Genogram |
| 3. Physical Diagram | 10. Physical exam |
| 4. Drug & alcohol abuse | 11. Suicide risk |
| 5. Accidental self-harm | 12. Mental state |
| 6. Presentation | 13. Background |
| 7. Risk of violence | 14. Developmental history |

2. MASTERCARE EMR ALSO HAS 14 UNIQUE ASSESSMENT WIZARDS!

These 14 wizards fall under the below 3 categories:

Initial presentation, mental state and background!

Initial Presentation: Details

Mental State: Appearance, speech, mood, thought form, thought content, perception, cognition, judgement / insight, and the examiners response

Background: Premorbid personality / history, psychiatric history, family and social history, and a general summary

3. DID YOU KNOW THAT WIZARDS ARE COMPLETELY CUSTOMISABLE?

Wizards can be customized by site, meaning you can configure your own custom assessment tools!

These customized tools can include any combination of the above mentioned assessment wizards or categories. Simply head to the administration module to start customising!

4. HAVE YOU TRIED OUR EMR VISUAL GENOGRAM TOOL?

EMR comes equipped with its own Visual Genogram, a simple tool that helps you visualize your assessments.

Popular among clinicians, this fantastic tool is designed to help the note taking process of assessment by recording clinically relevant details on each client in the form of an easy to use diagram. Look for it under the assessments tab!

5. DID YOU KNOW THAT YOU CAN COMBINE WIZARDS WITH FREE TEXT?

Wizards can also be used in combination with the free text feature in EMR!

This feature allows for clinicians to provide further detail and customisation to their already pre-filled clinical letters or notes.
